Day 2 August 27 (afternoon) 15-17 CET

'The Network of the European Blue Schools in the Baltics: Teachers' training workshop (ONLINE)

[ZOOM Link](#)

The main goals of bringing the ocean into the classroom are improving the understanding of the ocean and developing a sense of responsibility towards our planet. The more aware and literate of the ocean students are, the more they become active and responsible European citizens.

In a European Blue School, teachers actively make the ocean a relevant part of the school curriculum through project-based learning. Schools that take up this *Find the Blue* challenge identify an ocean topic that is relevant to them and create with their students a school project. Student ownership, collaboration with ocean stakeholders and sharing with the community will be key values of these projects. After successfully completing the project, schools will receive the European Blue School certification.

This workshop will focus on becoming a European Blue School by developing school projects on the Baltic Sea. The online workshop features presentations and demo's on the Baltic Sea by marine scientists and experienced educators who are renowned experts in their disciplines, small group discussions and professional guidance to become a European Blue School.

The workshop is designed for teachers who wish to become part of the Network of European Blue Schools, for all ages and at all student grade levels. Teachers in science, arts, languages, sports, economics, and other school subjects are all invited to participate.

After the workshop, you will:

- Understand why and what you should teach about the Baltic Sea.
- Know how to become a successful European Blue School.
- Be able to develop a school project on the Baltic Sea.
- Have inspiration to identify a topic, activities and partners for your school project.

Number of participants: maximum 100 teachers. After the completion of the workshop, participants get a certificate of participation. Workshop is conducted in English

AGENDA

15:00 – 15:15	Short welcome message. Why teach about the Baltic Sea? – Dominika Wojcieszek (Gdynia Aquarium)
15:15 – 15:45	On resources and summer schools on Baltic - Joachim Dengg (Geomar) and Tymon Zielinski (IOPAN)
15:45 – 16:00	European Atlas of the Seas - Nathalie Van Isacker (EMODNET)
16:00 – 16:15	VIRTUE project - Björn Källström (Göteborgs Marinbiologiska Laboratorium)
16:15 – 16:30	Implementing the Network of European Blue Schools in Gdynia, Poland - Dominika Wojcieszek (Gdynia Aquarium)
16:30 – 17:00	How to become a European Blue Schools, questions and discussion, workshop wrap-up - Evy Copejans (EMSEA)
